

A DOCUMENTARY FILM

# Force of Water

**Who can solve the global water crisis? As our world becomes more water stressed, how do we build solutions that will stand up to climate change?**

This one hour documentary film follows two communities, one in Ecuador and one in Uganda, as they confront these global dilemmas and mobilize to build their own piped water systems.

**For 2.2 BILLION PEOPLE** clean safe water flowing through a tap is still a distant dream!

The film explores this reality through the eyes of local community members and regional program staff working together to build community wide water access. As the story unfolds, they meet challenges big and small. How will organizers confront their neighbors who are not showing up for communal work days? Will budget deficits derail or reshape the projects? And we begin to understand the collaboration needed between local, national, and international stakeholders to create lasting change.

## **SOLAR TIME MACHINE:**

Solar water pumping has the potential to save families countless hours of time previously spent waiting in line, hand pumping, and hauling water. We witness the transformation possible when solar panels are added to a water system far from the national power grid.

## **GREEN EMPOWERMENT:**

Green Empowerment works with in-country partner organizations to build clean water and renewable energy infrastructure with Indigenous and rural communities across the globe. We believe partnership and community ownership are essential for building solutions that last. Come see for yourself!

**A one hour documentary film by Green Empowerment & Nathan.works  
Featuring ALTROPICO & The Water Trust**

# PARTNER WITH US

To present the film in your region!

## Debut tour of documentary with panel discussions geared toward:

Renewables & water sector professionals | Benefactors supporting this work  
People interested in sustainability, climate change, renewables & international development

### SCREENINGS:

- **Portland**
- **San Francisco**
- **New York**
- **Seattle**
- **Insert your city here!**

### Why become a presenting partner?

- Make a statement that your company/organization invests in global sustainability
- Leverage your support to raise awareness about Green Empowerment and bring in additional program funding
- Market your organization to in person attendees, 9,000+ followers on social media, and 5,000+ email subscribers

### PARTNERSHIP PERKS:

	Creek \$500	Stream \$1,000	River \$2,500	Wetlands \$5,000	Watershed \$10,000
Recognition as lead presenter + 60 second video					✓
Opportunity to include a 30-second video in the event program				✓	✓
Recognition as event co-presenter: Company logo on banner and table tents at event			✓	✓	✓
Recognition through social posts (audience of 9,500)		✓	✓	✓	✓
Visibility at event: your logo in slideshow carousel on the big screen!	✓	✓	✓	✓	✓
Visibility before event: your logo in event related emails (5,000 person mailing list) & on event website	✓	✓	✓	✓	✓
Comped event tickets	2	4	6	8	10

Also seeking a **\$50,000 GLOBAL PRESENTING PARTNER:**

includes lead presenter perks for all screenings in the debut tour + our global premieres!
